¹⁾ for DC current with formfactor 1,05, uncooled execution, protection IP 54, ambient temperature +40 °C.

²⁾ Continuous operation S1 (VDE 530), part 1,4. Motor can be run at all points of the torque speed curve S1, continuous speed beyond 4000 min⁻¹ is not recommended, please check the torque speed curve.

³⁾ Incremental motion cycle S3, VDE 530, part 1,4. Pulse duration 50 ms, 1% of duty cycle.

⁴⁾ Point of intersection torque speed curve S1 with torque co-ordinate at speed zero. Permitted at very low speed < 1min⁻¹. Works the motor with blocked shaft longer than 20s, the stall current must be reduced to appr. 70%.

⁵⁾ Based upon mounted motors, heat transfer from motor to equipment.
